

STX44

Bench-Top

Description

The STX44-xxBT (BenchTop) configuration is designed for integration where the StoreX is located on a table or on top of another unit. This configuration has the handling and climate controls on the top side of the instrument. The robotic access Gate is located on the lower side of the instrument.

The STX44-xxBT version is available as Flush Front or as Flush Back version.

The Flush Back configuration is used when the instrument is placed against the wall of another device such as a clean bench. For all other applications the Flush Front is used. Like all members of the StoreX family the STX44-BT can be equipped with a large number of further options and a wide selection of useful accessories. For details please refer to Options or Accessories.

1) Recommended for better accessibility

Minimum distances to the sidewalls of the units must be maintained in order to allow accessibility to main user door and in order to avoid the main user door to interfere.
