StoreX500 Series

## STX500

The STX500 with increased 440-500 MTP capacity and newly implemented Flush Gate. The newly developed handling with higher speed, spring loaded instead of counter weight, and flush gate improves the overall performance of the unit.

The Flush Gate simplifies integration by omitting any obstacle in the Gate area.

Access through the small robotic gate

Access through full-sized user door

This model offers high capacity while maintaining the same compact footprint of the STX220. The STX500 is ideal for high throughput labs with space constraints.

Like all members of the StoreX family the STX500 can be equipped with various types of further options and a wide selection of useful accessories. For details please refer to [www.liconic.com](http://www.liconic.com)

### Dimensions

#### Stand-Alone (SA)

The STX500 is available in three configurations.

Double Decker carousel with standard 540mm cassettes allowing 440 MTP capacity for maximum comfort for manual handling of cassettes. An optimised configuration using 540 mm cassettes on the lower deck and 680 mm cassettes on the upper deck will increase capacity to 500 MTP while maintaining comfort and safety of manual operation.

For maximum capacity 20 cassettes to 1200 mm will top capacity at 530 MTP making it the leader in its class.
