

STX220

Bench-Top

Description

The STX220-xxBT (BenchTop) configuration is designed for integration where the StoreX is located on the table surface or stacked on another unit. This configuration has the handling and climate controls on the top side of the instrument. The robotic access Gate is located on the lower side of the instrument.

Like all members of the StoreX family the STX220-BT can be equipped with various types of further options and a wide selection of useful accessories. For details please refer to Options or Accessories.
