- 509 (Defrost) is reset by T92 (3 mins) after defrost
- T92 is triggered by 3909
- 3909 is activated when $DM991 > DM901$
- DM901 is calculated out of DM891
- When $DM991 > DM901$, the compressor is switched off ($515=0$) for period=T92
